What is a CryptoFund application?

CryptoFund App at a glance

The CryptoFund investment application was launched in October 2020, and by collecting micro-capital from people who do not have enough knowledge and time to trade and operate in the Cryptocurrency market, it has established a monthly fund for investment.

“By investing in our monthly fund; take advantage of daily trades and exchange of cryptocurrencies”

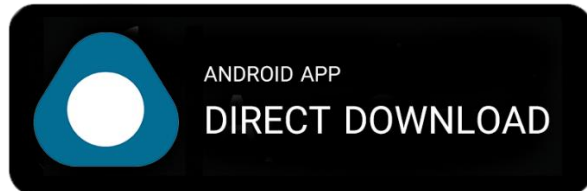

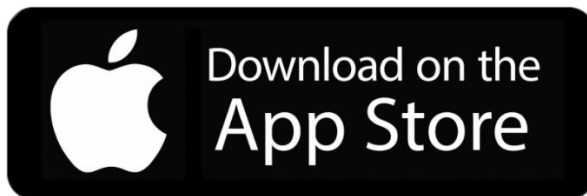

In this application, at the beginning of each month, a fund called the same month, such as May 2021, opens, and users will be able to deposit the desired capital into the fund from the balance of their wallet in the first 4 days of the month. This amount will be non-deductible (freeze) for the user from the beginning of the 5th day until the end of the month, and our analysts and traders will work with this amount. Instant profit and loss report will be visible in the application. At the end of the month, that month's fund will be closed automatically and the principal + net profit will be credited to the user's wallet.

You can see the profit / loss report of the last monthly funds from the report's menu on the site or application.

To invest in monthly funds, you have to charge your wallet with Tether (USDT). You can use Ethereum (ERC20) and Tron (TRC20) networks to deposit to your wallet.

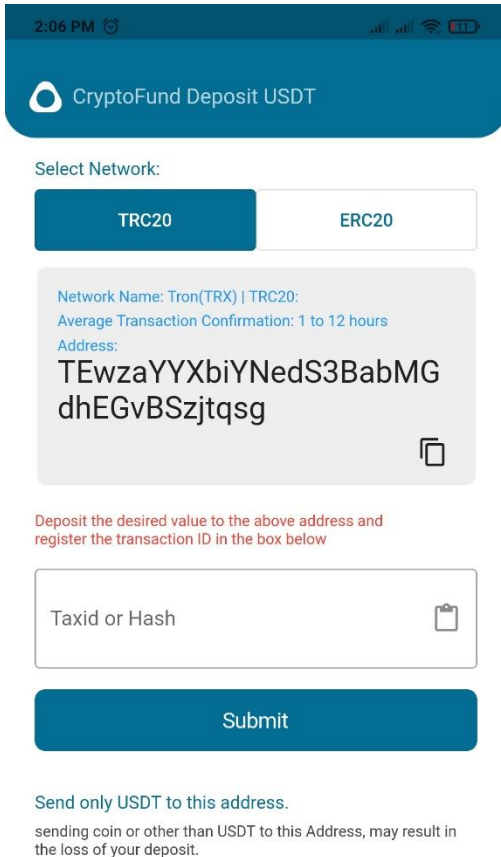

Where to install the application?

CryptoFund application is created only for smartphones and is available in Android and iOS versions.

How to deposit Tether (USDT) in our wallet?

The first step after installation and registration

2:06 PM

CryptoFund Deposit USDT

Select Network:

TRC20 ERC20

Network Name: Tron(TRX) | TRC20:
Average Transaction Confirmation: 1 to 12 hours
Address:
TEwzaYYXbiYNedS3BabMGdhEGvBSzjtqsg

Deposit the desired value to the above address and register the transaction ID in the box below

Taxid or Hash

Submit

Send only USDT to this address.
sending coin or other than USDT to this Address, may result in the loss of your deposit.

1. Select the network type (TRC20 or ERC20)
2. Copy the displayed address
3. Deposit the desired amount from your wallet or exchange to this address
4. After depositing, enter the **Taxid** or **Hash** in the box
5. **Your transaction will be automatically checked and if confirmed, wait for admin approval**

important points:

- Send only USDT to CryptoFund address
- Be careful in choosing the deposit network
- Duplicate transactions will be automatically rejected
- Confirmation of transactions will take up to 12 hours
- Transactions that are more than 3 hours after the transfer will not be approved

Your balance is kept in cold and safe wallets. And you will be able to withdraw inventory at any time.

How to invest in a monthly fund?

Experience a smart investment

The screenshot shows the 'CryptoFund Deposit USD' screen. At the top, there's a status bar with the time '2:06 PM' and signal strength. Below that, the app title 'CryptoFund Deposit USD' is displayed. A 'Select Network:' section has two buttons: 'TRC20' (selected) and 'ERC20'. Below this, a grey box displays the network name 'Tron(TRX) | TRC20', the average transaction confirmation time '1 to 12 hours', and the address 'TEwzaYYXbiYNedS3BabMGdhEGvBSzjtqsg' with a copy icon. A red warning message states: 'Deposit the desired value to the above address and register the transaction ID in the box below'. Below the warning is a text input field labeled 'Taxid or Hash' with a copy icon. A large blue 'Submit' button is at the bottom. At the very bottom, a warning message reads: 'Send only USDT to this address. sending coin or other than USDT to this Address, may result in the loss of your deposit.'

Investing in funds is possible only in the first 4 days of the month!

1. Click the "investment" button in the dashboard
2. Enter the desired value in the box and submit
3. Wait ... the fund will start on the 5th day

important points:

- Until the 4th day, it is possible to change the amount
- The amount invested cannot be withdrawn until the end of the month

Do you want to invest automatically?

From Setting > Auto Reinvest

By selecting one of the percentages, you can allow the app to freeze a certain percentage of your investment balance at the beginning of each month.

Note: This feature is enabled by 75% for all users by default. Disable it if you do not want to invest automatically!

How to withdraw Tether (USDT)?

2:56 PM
